Mike, attached is the field sampling sheet for all of the Summa canisters. I apologize if I didn't send this to you earlier. We must have thought the 6 was a 5 when we read it off. I will make the change in Scribe.

 **CAUTION:** This email originated from an external sender. Verify the source before opening links or attachments. 

Quinn,

Thanks for delivery remaining samples for Patterson on Friday afternoon. Logging in this morning. I noticed that for sample PSP10-AA-DUP, the canister # on the label and the can do not match. Canister # is 6677 but label has 5677. Typo?

The canister #'s are not on the COC so not a custody issue per se. The 7 unused canisters #'s are not even close to these serial #'s. I suspect it is just a transcribing error. Can you check to make sure?

Thanks,

Mike Beall

Tetra Tech will be delivering all of the ambient air and soil gas samples to the Region 4 Lab today. Attached are the COC and XML files. This project is now complete.
Please let me know if you have any questions.

Thanks,
